

Database Query - Disposal Records Entity

Last Modified on 09/11/2026 7:38 am PDT

Pathway: Database > Database Query

The **Disposal Records** entity can be used to generate a line-item detailed report for each time a truck crossed a scale at a disposal site. It provides a way to view your tipping activity, capturing the exact weight, cost, and material type for every load dumped. This data can be used for reconciling landfill invoices and billing for "Haul + Tonnage" customers.

The screenshot displays the 'Database Query' interface. At the top, there's a 'SAVED QUERY' dropdown and buttons for 'NEW', 'UPDATE', 'SAVE AS', and 'RUN'. Below this are two main sections: 'ENTITIES' and 'LIMIT / SORT'. The 'LIMIT / SORT' section includes a 'ROW LIMIT' dropdown. The 'DISPLAY FIELDS' section is partially visible, showing a table with columns: ENTITY, SEQ, FIELD, and ALIAS. A 'SELECT MAIN ENTITY' popup is open, showing 'Disposal Records' selected in the 'ENTITY' dropdown and an empty 'ALIAS' field. A 'SAVE' button is at the bottom of the popup.

Initiating a Disposal Records Query

To generate a **Disposal Records** report using the Database Query tool, follow the steps outlined below. Reference the [Database Query](#) article for more details on how to use the tool for reporting.

1. Go to the *Database > Database Query* screen.
2. Click the **New** button in the top control bar. This will open the **Select Main Entity** popup.
3. Select **Disposal Records**.
4. After the **Display Fields** for the **Disposal Records** entity populate, select the check boxes for the fields you want to include in the report.
 - If a specific order is required, select the fields in the order you want them to appear in the query.
5. Click **Run** to execute the query. Results are generated in a new tab with the date and timestamp.

[illegible]

Columns Available for Display

The following data can be pulled in when running a Disposal Records report.

Field Name	Description
Disposal Information	
Disposal Record Id	Unique ID for the disposal record.
Ticket Id	Unique ID or reference number for the disposal, scale, or ticket transaction.
Disposal Location Id	Unique ID for the facility or location where the material was disposed of or processed.
Disposal Location	Name of the disposal facility or processing location.
Disposal Date	Date when the disposal transaction occurred.
Date Time	Date and time associated with the disposal record or transaction.
Start Timestamp	Date and time when the service or disposal activity began.
End Timestamp	Date and time when the service or disposal activity ended.
Disposal Record Note	Notes or comments recorded about the disposal transaction.
Disposal Rate	Rate charged or applied for disposal services.
Disposal UOM Id	Unique ID for the unit of measure used for disposal quantities.
Calculated Quantity	System-calculated quantity used for billing, reporting, or disposal processing.
Minimum Quantity	Minimum quantity used when calculating disposal charges or service quantities.
Quantity	Quantity of material recorded for the disposal transaction.
UOM	Unit of measure used for the recorded quantity.
Volume	Volume of material associated with the disposal transaction.
Volume UOM ID	Unique ID for the unit of measure used for the recorded volume.
Volume UOM Name	Name of the unit of measure used for volume, such as cubic yards.
Weight In	Vehicle weight recorded when entering the disposal facility.
Weight Out	Vehicle weight recorded when leaving the disposal facility.
Material	Material associated with the disposal transaction.
Material Type Id	Unique ID for the specific material type.
Material Class Id	Unique ID for the material classification.
Disposal Cost	
Total Cost	Total cost associated with the disposal transaction or service.

Field Name	Description
Fee1	First additional fee applied to the disposal transaction.
Fee2	Second additional fee applied to the disposal transaction.
Fee3	Third additional fee applied to the disposal transaction.
Fee4	Fourth additional fee applied to the disposal transaction.
Fee5	Fifth additional fee applied to the disposal transaction.
Account and Site Information	
Account Id	Unique ID for the customer account associated with the disposal record.
Account Name	Name of the customer account associated with the disposal activity.
Account Class Id	Unique ID for the customer account classification.
Account Class Name	Classification of the customer account.
Site Id	Unique ID for the customer service site associated with the disposal record.
Site Name	Name of the customer property or service location.
Site Address Line 1	Primary street address of the service site.
Site Address Line 2	Additional address information for the service site, such as a suite or unit number.
Site City	City where the service site is located.
Site State	State or province where the service site is located.
Site Zip	Postal code for the service site.
Route, Driver, and Equipment	
Route	Route designation associated with the disposal activity.
Driver	Name of the driver assigned to the route or vehicle.
Truck Name	Name, number, or fleet designation of the truck used for the service.
Tank Id	Unique ID for the tank or container associated with the disposal record.
Tank Name	Name or designation of the tank or container associated with the service.
Operations and Organization	
Division Id	Unique ID for the operating division responsible for the disposal service.
Division Name	Name of the operating division responsible for the transaction.
Line of Business Id	Unique ID for the line of business associated with the service.
Period Id	ID representing the reporting period for the disposal record.

Field Name	Description
Service Region Name	Name of the geographic or operational service region.
Service Region Id	Unique ID for the service region.
Service Code Name	Name of the service code associated with a disposal record.
Work Order PO Number	Purchase order or work order reference number associated with a disposal record.
Work Order Number	Work order number associated with a disposal record.
